Education:

**4th year student.
Starting 2019.
Faculty of Medicine AI - Baath
University.**

About me

An enthusiastic adaptive and fast - learning 4th year medical student .I work as a part time private teacher of chemistry and physics and mathematics. I have always had a profound interest in human biology and science in general , but the social aspect of medicine is equally important to me as well . Simply observing the positive effect medicine has on people everywhere has solidified it as a career choice for me.

Languages

Arabic

English

native speaker Intermediate
